TOOTHPASTE THAT CAN ACTUALLY
REPAIR
SENSITIVE TEETH[†]

Sensodyne, NovaMin and the rings device are registered trade marks of the GlaxoSmithKline group of companies.

Advanced NovaMin® Technology

"I recommend it!"
Mark Hughes
Dentist, London

That occasional twinge you may get when you drink something cold could mean a specific area of your tooth is vulnerable.

Now you can actually help repair that area with a new kind of Sensodyne toothpaste.

New Sensodyne Repair & Protect seeks out and repairs sensitive areas using the same minerals teeth are made of.

Brush twice a day, every day to stay protected.

sensodyne.co.uk

[†]Repair provides clinically proven relief with twice daily brushing.
